Opportunities — These suggestions can help your page load faster. They don't [directly affect](#) the Performance score.

Opportunity	Estimated Savings
Reduce unused JavaScript	0.28 s
Eliminate render-blocking resources	0.27 s

Diagnostics — More information about the performance of your application. These numbers don't [directly affect](#) the Performance score.

▲ Ensure text remains visible during webfont load	▼
▲ Image elements do not have explicit <code>width</code> and <code>height</code>	▼
▲ Serve static assets with an efficient cache policy — 5 resources found	▼
○ Avoid chaining critical requests — 11 chains found	▼
○ Keep request counts low and transfer sizes small — 24 requests • 540 KiB	▼
○ Largest Contentful Paint element — 1 element found	▼
○ Avoid large layout shifts — 5 elements found	▼
○ Avoid long main-thread tasks — 3 long tasks found	▼
Passed audits (29)	▼

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

Names and labels — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

▲ Buttons do not have an accessible name	▼
▲ Image elements do not have <code>[alt]</code> attributes	▼
▲ Form elements do not have associated labels	▼
▲ Links do not have a discernible name	▼

Contrast — These are opportunities to improve the legibility of your content.

▲ Background and foreground colors do not have a sufficient contrast ratio.	▼
-----------------------------------------------------------------------------	---

ARIA — These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.

▲ ARIA IDs are not unique	▼
---------------------------	---

Tables and lists — These are opportunities to improve the experience of reading tabular or list data using assistive technology, like a screen reader.

▲ List items (<code></code>) are not contained within <code></code> or <code></code> parent elements.	▼
---------------------------------------------------------------------------------------------------------------------------------------	---

Additional items to manually check (10) — These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).

Best Practices

Trust and Safety

- ▲ Links to cross-origin destinations are unsafe ▼
- ▲ Includes front-end JavaScript libraries with known security vulnerabilities — 2 vulnerabilities detected ▼
- Ensure CSP is effective against XSS attacks ▼

User Experience

- ▲ Serves images with low resolution ▼

General

- Detected JavaScript libraries ▼
- ▲ Issues were logged in the [Issues](#) panel in Chrome Devtools ▼

Passed audits (12) ▼Not applicable (1) ▼

SEO

These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on [Core Web Vitals](#). [Learn more](#).

Content Best Practices — Format your HTML in a way that enables crawlers to better understand your app's content.

- ▲ Document does not have a meta description ▼

▲ Image elements do not have `[alt]` attributes

Additional items to manually check (1) — Run these additional validators on your site to check additional SEO best practices.

Passed audits (8)

Not applicable (4)

Progressive Web App

These checks validate the aspects of a Progressive Web App. [Learn more.](#)

Installable

▲ Web app manifest or service worker do not meet the installability requirements — 1 reason

PWA Optimized

▲ Does not register a service worker that controls page and `start_url`

▲ Does not redirect HTTP traffic to HTTPS

▲ Is not configured for a custom splash screen **Failures: No manifest was fetched.**

▲ Does not set a theme color for the address bar.
Failures: No manifest was fetched, No `<meta name="theme-color">` tag found.

○ Content is sized correctly for the viewport

Has a `<meta name="viewport">` tag with `width` or `initial-scale`

Provides a valid `apple-touch-icon`

▲ Manifest doesn't have a maskable icon **No manifest was fetched**

Additional items to manually check (3) — These checks are required by the baseline [PWA Checklist](#) but are not automatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually.
